

SimaPro Power User package, comprising of the most comprehensive SimaPro Developer version, was designed for the expert LCA practitioners and researchers. It has advanced features, such as direct Excel/ASP linking, and its COM interfacing allows you to create dedicated LCA tools. Visit simapro.com to compare different packages.

Connect with other tools

Power User gives you access to external tools or data and allows you to create intuitive interfaces. You can also link to other software, Excel and SQL databases. The Collect extension enables efficient data collection, while Share allows you to compare scenarios and directly shows the impact of certain decisions.

Advanced modelling

The Power User package enables you to build complex, transparent models. You can model from a life cycle perspective with uncertainty calculation, process and project parameters, insight in unit processes, allocation of multiple output processes, weak-point analysis and complex waste treatment. The parse feature allows you to import parameter sets from Excel, saving you a lot of work.

Multi-user option

SimaPro's multi-user feature is unique among LCA software solutions. It allows multiple people to work on the same project simultaneously, in one shared central database. Collaborate with your colleagues in real time, even when they are working in different offices or even different countries.

All add-ons in one package

Collect

Optimised data collection

Optimise data collection from stakeholders and suppliers and monitor your data collection progress. SimaPro Collect has a user-friendly dashboard that contains standard survey templates, that are easy to fill out. Expert users can also customise the templates to create new surveys. Everything is accessible in one web-based platform, which makes it easy to track the status of your survey.

Share

Create and share scenarios

Create product scenarios and share them with anyone you want, even if they don't have access to SimaPro. SimaPro Share allows to interactively evaluate 'what if' scenarios and experience the impact of their decisions first-hand. This streamlines business applications such as product design, EPDs and ISO-compliant studies. You'll no longer have to recalculate results for each question, and you help ensure that your sustainability insights will be used to drive change.

Report Maker

Create graphs and tables

Save time on creating LCA reports. With Report Maker, you can create graphs and tables in MS Word and MS Excel, and they will be automatically updated as you change your model and data in SimaPro. You can also use Report Maker in combination with the 'Import Scenarios' feature which can help to generate the data for your Environmental Product Declarations (EPDs) or other recurring reports.

Experience the full potential of SimaPro

Features

- Analysis of Groups
- Import data (.csv and SimaPro format)
- Export data (.xls and .txt format)
- Save inventory data as system processes
- Multi-user license
- Compatible with Report Maker add-on
- Parameters (scenario analysis)
- Monte Carlo analysis
- Export data (.csv and SimaPro format)
- Import and export of Eco Spold data
- Library editing
- Move project data to library
- Edit system descriptions
- Library switch
- Tree view
- Export to matrix
- Hide confidential data
- Wizard development
- 2 way COM interface
- Direct link to Excel and SQL database

Price

This package is available as a one year subscription or as a perpetual licence. It includes a free one-year service contract, and you can buy additional years of service. The prices include ecoinvent v3 database licence, but you can choose an option without it. Contact us for a quote.

Power User licence	First user	Extra user
Perpetual licence	\$17,160	\$ 12,800
Subscription (12 months)	& 8,580	\$ 6,400
Service contract*		
1st year	free	free
1st + 2nd year -5% discount	\$ 2,470	\$ 1,278
1st + 2nd +3rd year -10% discount	\$ 4,680	\$ 2,398

*the prices are only valid during your initial SimaPro order
